

Thermo Scientific Heraeus Heracell 150i CO₂ Incubators

Your cultures are valuable, often irreplaceable. Surround them with an environment you can trust. Thermo Scientific CO₂ incubators deliver everything you need to achieve your cell culturing goals.

Benefits of choosing 100% copper interior:

- > Effective against contamination: Eliminates microbial contaminants quickly and effectively (up to 99.9%)
- > Always working: The antimicrobial properties of 100% pure copper provide continuous protection against contamination on contact, all day every day.
- > Easy to maintain: No special handling is required for copper and maintenance is minimal
- > Improves with time: The antimicrobial efficiency of 100% pure copper interiors improves as the surface oxidizes over time, visible as tarnishing
- > Safe for cells: Because the copper ions do not become airborne, they pose no threat to precious cells incubated in culture flasks on copper shelves

Discover why more laboratories rely upon Thermo Scientific CO₂ incubators than any other brand. Contact primasci@primasci.com or visit us online
