

บริษัท ปริมา ไซเอนติฟิค จำกัด
PRIMA SCIENTIFIC CO.,LTD.

Capillary Sequencing

1. Standard Sequencing

- Include cycle sequencing reactions, dye terminator removal, capillary electrophoresis run and result analysis

2. Ready-to-run Sequencing

- Include capillary electrophoresis run and result analysis only

3. Ready-to-run sequencing with Dye Removal

- Include dye terminator removal, capillary electrophoresis run and result analysis

4. PCR clean-up Sequencing

- Include unpurified PCR template clean-up by either gel or column methods, followed by Standard Sequencing service

5. Clone Sequencing

- Include single colony growth, plasmid template extraction and purification, followed by Standard Sequencing service

6. Primer Walking Sequencing

- Include subsequent primer design in one or both directional to fully sequence the region of interest in the plasmid
